

Data moderation

Public OCHEM properties may have an assigned moderator who is responsible for approving data records for this property.

This page describes how a moderator can view, manage and approve the data records.

Moderator's corner

Data moderators have access to a special page: moderator's corner available via "Moderation" menu:

Moderator's corner displays a summary of all data records for the properties assigned to this moderator. As displayed below, the data can be grouped in a flexible manner: by property, by data introducer, by publication, etc.

Flexible groupings allow to review data records individually for each data introducer, each publication and each property.

OCHEM data: analytical report

Select the desired data groupings. The groupings can be re-ordered.

- ☐ Primary record status ↓
- ☒ Property ↑ ↓
- ☐ Experimental condition ⓘ ↑ ↓
- ☐ Data introducer ↑ ↓
- ☐ Publication ↑

Property	Awaiting approval	Rejected records	Approved records	Models awaiting approval	Approved models
Totals	78146		120488	2	3
Melting Point	72172		69199	2	2
logPow	4		45805		1
EC50 aquatic	5937		4771		
Binding constant	33		698		
EC50 abiotic reactivity			15		

Another example with grouping by data introducer:

OCHEM data: analytical report

Select the desired data groupings. The groupings can be re-ordered.

- ☐ Primary record status ↓
- ☒ Property ↑ ↓
- ☐ Experimental condition ⓘ ↑ ↓
- ☒ Data introducer ↑ ↓
- ☐ Publication ↑

Property / Introducer	Awaiting approval	Rejected records	Approved records	Models awaiting approval	Approved models
Totals	78146		120488	2	3

Data approval

To approve particular data records, please:

1. Click on the data records count
2. Click "select all"  or select the desired records individually
3. Click "approve"
4. Review the summary of the records being approved more and finally,
5. Approve the data records

In case there are any issues with particular data records (errors in values, structures, units of measurements, etc), the data moderator can reject the problematic records using the same procedure as for approval but choosing

"reject"  instead.

Alternatively, user can contact the data introducer via internal chat and discuss the data quality issues.

Typical data approval process:

Property / Introducer	Awaiting approval
Totals	78146
Melting Point	72172
✉ itetko	72004
✉ charochkina	168

 midnighter

Dear Vlad, the data records for the Ames test property are missing the "S9 activation" information. Please, advice whether you can add such information so that I can approve your data.
